Newsletter 2 / 2019

Dear CERTAIN and ERKNet paediatric transplant centre chairs,

the CERTAIN meetings give us an excellent European platform for collaborative research and education in the field of paediatric renal transplantation. In line with this, we believe that promoting the collaboration between nephropathologists allied to the CERTAIN and ERKNet paediatric transplant centres is of great importance. To facilitate this, we would like to organize a workshop for nephropathologists affiliated to CERTAIN centres and the respective paediatric nephrologists to:

- promote contact among paediatric nephropathologists from all paediatric transplant centres within CERTAIN
- share up-to-date knowledge on paediatric renal transplant pathology
- establish a platform that will facilitate joint nephropathology research projects in CERTAIN
- provide an active learning and discussion platform with international leaders in the field.

SAVE THE DATE: CERTAIN Nephropathology Workshop Rotterdam, 15-16 November 2019

On Saturday November 16th, 2019 we will organize the first CERTAIN Nephropathology Workshop at the Erasmus MC in Rotterdam, The Netherlands. We also wish to involve the Renal Pathology Society and plan to have a satellite symposium the day before, on Friday November 15th for review and discussion of native kidney disease pathology.

Of course, this workshop will not only be open to nephropathologists; paediatric nephrologists and transplant physicians involved in renal (transplant) patient care are also invited to attend this educational and research conference.

Two request for you from our side:

1. Please **forward this Newsletter** to your affiliated **nephropathologists**.
2. Please **send us the contact information** (name, institution and email address) **of your local nephropathologists** so that we can approach them personally in the future. Many thanks!

We are looking forward to this collaboration with you!

Kind regards,

Marian Clahsen-van Groningen, chair, local organizing committee
